See what others have to say

Cooking the **OLD WAY**

"Before, I used a 50 shilling tin of charcoal for just 1 meal. Now, I use 1 tin to make 3 good meals for my family."

Teresia Wanjogo, Kawangware

Jikokoa inatumia makaa kidogo, haina moshi, inawaka haraka na ni safi. Hata naweza kuweka sebuleni!

Pongezi BURN Manufacturing!

Rodah Mueni Matu, Embakasi

"It's doing very well! Fast to use, economical, portable and has a strong body."

It's the best!"

Douglas S Mulati, Ruiru

Cooking **THE jikokoa™ WAY**

Uses 1 to 2 tins of charcoal depending on family size

Designed in the USA
Manufactured in Kenya

WORLD-CLASS TECHNOLOGY

BURN's state-of-the-art design center in Seattle, USA, spent three years designing the **jikokoa** to meet the demands of Kenyan consumers.

Our modern cookstove manufacturing facility in Ruiru employs 100+ people (50% are women!) and produces thousands of cookstoves each week.

High-temp, lightweight **ceramic insulation** is designed to withstand 1300°C and keep your jikokoa cool to the touch.

The high durability **chrome grate** balances fuel and air mixture.

The **ergonomic handles** are designed for ease of use and won't overheat.

The **easy-to-use ashtray** allows you to control the temperature while you cook and keeps your jikokoa clean.

100% MANUFACTURED IN KENYA

FUELING BUSINESS

"As a distributor, I have grown a lot of love for the jikokoa. I started out last year with only 30 jikokoas and no workforce. But as of now, Karlin has grown and we have employed 11 people. This is due to the steady flow of orders and demand.

The jikokoa has all the attributes, design and pricing that gives the right package for our customers.

The jikokoa sells itself!"

Fred Gichuki, Karlin Company Ltd.

"Before my children would cough because of the smoke. They would get headaches and get dizzy. Now, they do not have that problem."

Ruth Ongubo, Kibera, Nairobi
