

GAS STOVE SAFETY TIPS

1 Strike match first before turning on the gas.

2 Turn on the burner by rotating the knob anti-clockwise, shut it off after use by turning the knob clockwise.

3 Place gas cylinder upright and in a well ventilated area.

4 Never roll a cylinder in horizontal position.

5 Always place on a leveled surface.

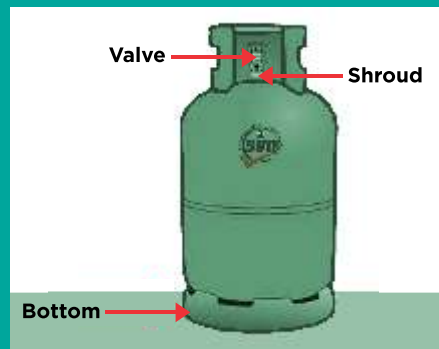

6 The cylinder should not be placed directly in the sun.

7 The following should not be used near the stove to keep the family safe; Insecticides/ aerosols, candles, kerosene lamps and cigarettes.

8 Never leave food on the fire unattended.

9 How to ensure your cylinder is safe to use:

- Look out for the Standard Organization of Nigeria (SON) sign embossed on the cylinder.
- Check for the expiry date.
- Check for rust on the bottom of the cylinder.
- Check for shroud around the valve.

10 Children should not play with gas.

GAS STOVE SAFETY TIPS

IN CASE OF A FIRE

1 Do not douse a fire with soapy water.

2 Keep extinguisher in an easily accessible location.

3 A growing fire can't be put out, vacate the area and call fire service.

P - PULL THE PIN.

A - AIM LOW.

S - SQUEEZE HANDLE

S - SWEEP THE FIRE

Hold extinguisher with nozzle pointing away from you and release locking mechanism.

Use fire extinguisher, using PASS method:

P-Pull the pin.

A-Aim low. Point extinguisher at base of fire.

S-Squeeze handle slowly and evenly.

S-Sweep the fire from side to side.

IN CASE OF GAS LEAK

1 Do not panic. Open windows and doors to let gas escape.

2 Use soapy water to check for gas leak, not naked flame.

3 Take your gas cylinder to your dealer for a safety check. It is also recommended that a cylinder should be taken for an integrity test every 5 years from the date of purchase to make sure it is still safe to use.
